

University of Massachusetts Dartmouth
CIS 370, Fall 2013
Lab 1: UNIX Commands
09/10/2013 & 09/12/2013

Objective

In this lab, you are going to familiarize yourself with several important UNIX/Linux commands. Specifically, in this lab you will learn the basic concepts of *shells*, shell programming with the *bash* shell, and the usage of some basic Linux commands.

Deliverable

You will have a QUIZ in Lab in TWO WEEKS to test your understanding of the different commands. We will move on to Lab 2 next week, so you will be responsible for studying the material from Lab 1 on your own!

Quiz

Section 01 (Tuesday) – Tuesday, 09/24/2012

Section 02 (Thursday) – Thursday, 09/26/2012
